

About TIE

TIE, abbreviation of Talents Innovation Ecosystem, founded by Tsinghua Holdings in 2017, is an international platform which aims to gather global scientific technologies, projects and innovation talents. Since its foundation, TIE has made extensive communication and cooperation with Future Science City, Huairou Science City, Zhongguancun (ZGC) Development Group and Zhongguancun (ZGC) Life Science Park in the area of life science and biomedicine, information technology of new generation, energy and materials, and others.

Focus on Science Frontier, Promote Regional Cooperation, Improve Academic Level, Enhance International Influence. TIE sincerely welcome partners from all over the world to join us in promoting greater collaboration, cooperation, and development in the progression from technological to industrial innovation.

Science Asia Conference

Science Asia Conference is a series of high-end academic conferences co-organized by top international journals and their publishers, Talents Innovation Ecosystem and partners in Asia. The conference strives to create a high-end platform for crossover communication of global scientific technologies and innovation talents, to promote professional discussions and to boost the development of global scientific technologies.

Science Salon

Organized by TIE and ZGC Life Science Park, with the topic of *Interchange Thoughts and Discuss Science Together*, Science Salon has livestreaming on the WeChat Official Account and Channels of TIE and official website of *Science Asia*.

In Science Salon, we play videos of the speakers' academic presentations, publish the reports to promote for companies, and interview the senior experts or young scientists in different industries and areas. By the way, we honestly and constantly collect projects facing the whole society. You can follow the WeChat Official Account of TIE directly and send your personal information to the editor. Warm welcome to join us!

Science Training

TIE organizes and plans the top-level international conferences and carries out the customized professional training both online and offline. Besides, TIE also provides the service of publishing special issues for companies, universities, industrial parks and local governments in order to introduce the achievements and policies of scientific research to the global scientific researchers.
